RUBEN TORRES

Full Stack Engineer
Santiago, Chile
rubentdlh@gmail.com
+56 9 71522920

PROFILE

I take pleasure in building software that solves real problems and is delightful to use.

I have solid knowledge of web technologies and strongly believe in adhering to industry best practices.

As a product-oriented developer, I am proactive in proposing innovative ideas and solutions and committed to validating ideas early by soliciting feedback, and iterating upon a given solution.

Passionate about entrepreneurship and innovation, I have initiated several projects independently. These ventures left me with valuable lessons and allowed me to grow both personally and professionally.

EMPLOYMENT HISTORY

Full Stack developer, AyHungry, Santiago
AUGUST 2024 — PRESENT

Collaborated closely with the founders in the decision making process by ideating new features and prioritizing the roadmap, making sure it was aligned with our vision and business goals.

I designed and implement new features for the Restaurant Industry, mostly focused around feedback and sentiment analysis using machine learning.

Founder, metaterra.dev, Santiago
MARCH 2022 — AUGUST 2023

I led a small team to build interactive web experiences around digital collectibles, digital art and games, generating tens of thousands of dollars in revenue.

Front-end Engineer, Consensys, NY (Remote)
NOVEMBER 2017 — FEBRUARY 2022

I collaborated with a multi-disciplinary team to design, build and optimize decentralized applications on the Ethereum Blockchain, with the goal of bringing traceability, transparency and tradability to the our client's processes.

Fullstack Engineer, Clinicsense, Toronto (Remote)
JANUARY 2017 — NOVEMBER 2017

I built new features and optimized existing ones, for a SaaS platform in the massage therapy industry, using a stack consisting of python/django and React/Redux. During this time I had technical ownership of new features and worked alongside the founders to discuss the most optimal solutions.

Front-End Engineer, Telefónica I+D , Santiago
JULY 2015 — JANUARY 2017

I collaborated with a small, multidisciplinary team to build innovative IoT solutions for agriculture, mining and smart cities.

Working in close collaboration with UX specialist to create intuitive and functional interfaces for web applications.

During my time here I also mentored junior developers to help them grow and contribute more effectively to the organization.

Lead Front-End developer, Schibsted Chile, Santiago

Led a team of 3 Front-end developers in defining and implementing best industry practices to significantly improve the performance and responsiveness of our web applications across all supported devices and screen resolutions, for a marketplace with over a million visits a day.

Lead Developer, Talaentia, Caracas - Santiago

JANUARY 2011 — JUNE 2013

EDUCATION

Computer Engineering, Universidad Simón Bolívar, Caracas, Venezuela

MARCH 2011

Masters Degree in Artificial intelligence , Universidad Adolfo Ibañez, Santiago, Chile

MAY 2023 — PRESENT
